

LockGREED Economics

Do not be fooled by LockGREEDS proposal, it is nothing but a “what cup is the \$ under” trick, and they want you to believe you picked the right cup! The Company’s substandard offer will put more money in the pockets of LockGREED and cost you and your family dearly. Inflation is at 8.5% and climbing, and the Company thinks you are going to accept the same old General Wage Increases that you have seen over the past several contracts. If you accept substandard General Wage Increases, how can you put food on the table, gas in the gas tank, and pay the increased cost associated with an under seeded High Deductible Health Plan? You can’t, it just doesn’t add up.

The best fighter jets in the world are built right here in Fort Worth and LockGREED needs to step up and show its appreciation for the Essential Workers who came to work every day during a worldwide pandemic! A pandemic that so far has cost more than 30 of your colleagues their lives. The Company needs to propose wages that keep up with inflation and they need to stop their attack on trying to water down the little bit of cost-of-living protections we have left. You need to remind Company leaders that you didn’t have the luxury of working from home the past two years, you were in the trenches getting the job done to keep the corporate cash register ringing!
